EDUCATION

B.Tech CSE
Anurag University
2022–Present

Intermediate
New Chaitanya Jr College
2020–2022

SSC
St. Theresa School
2020

SKILLS

Speech & Agents
Pipecat, STT/TTS integration, voice-agent workflows, VAD, tool calling

Frontend & Backend
React.js, HTML, CSS, Tailwind CSS,FastAPI, Node.js, Express.js, MongoDB, SQL, REST APIs, Azure DB, PostgreSQL

AI & ML
OpenAI API, Vertex AI, Gemini, Generative AI, RAG, Vector Databases, Embeddings, NLP, Prompt Engineering, Context Design, LLM Tool Calling, Agentic AI

AIFrameworks
LangChain,LangGraph,Langwatch, Langfuse,langsmith,RAGAS

Web Scraping & Automation
Playwright, Browser Automation, OCR (EasyOCR)

Cloud & DevOps
Microsoft Azure, AWS, Google Cloud Platform (GCP), Linux (Ubuntu), systemd, SSH, Tailscale VPN, CI/CD Deployment

Databases
PostgreSQL, SQL, MongoDB, Qdrant, Schema Design, Query Optimization, Connection Pooling

Programming & tools
Python, Java, JavaScript,Git, GitHub, VS Code, Postman, Docker

CERTIFICATIONS

- NPTEL – Machine Learning
- Microsoft AI Challenge

PROFILE

Computer Science Engineering student with hands-on experience in Full Stack Development, Artificial Intelligence, Generative AI, and conversational AI. Skilled in Python, FastAPI, React.js, Node.js, Express.js, PostgreSQL, MongoDB, REST APIs, and Large Language Model integration using OpenAI, Gemini, and Vertex AI. Experienced in building RAG pipelines with Qdrant, vector embeddings, semantic search, and domain-specific knowledge bases. Hands-on experience developing real-time voice AI applications using Pipecat, STT, TTS, WebSockets, and audio streaming. Strong knowledge of prompt engineering, LLM tool calling, context design, API integration, database development, web scraping, automation, and AI model evaluation, with exposure to Docker, Azure, Google Cloud, Linux, and CI/CD deployment.

INTERNSHIP

AI Engineering Intern — Farm Vaidya AI Tech Private Limited — May 2026 – Present

- Developed AI-powered full-stack applications integrating LLMs, backend APIs, and frontend interfaces.
- Built Retrieval-Augmented Generation (RAG) pipelines using domain-specific knowledge bases.
- Designed scalable backend services in Python and integrated multiple AI APIs.
- Implemented prompt engineering, testing, debugging, model evaluation, and performance optimization.
- Collaborated with engineering teams to develop and deploy production-ready AI solutions.
- Integrated speech and conversational AI technologies into end-to-end applications.
- **Tech Stack:** Python, Vertex AI, RAG, REST APIs, Prompt Engineering, Full Stack Development.

PROJECTS

1) Real-Time AI Voice Agent — **GitHub**

- **Developed a real-time conversational AI voice agent using Pipecat for agricultural farmer queries over live phone calls.**
- **Integrated streaming Speech-to-Text (STT), Large Language Model (LLM), and Text-to-Speech (TTS) into a low-latency voice pipeline.**
- **Built hybrid Retrieval-Augmented Generation (RAG) using Qdrant vector search and BM25 with Reciprocal Rank Fusion.**
- **Integrated Acefone and Smartflo telephony with Voice Activity Detection (VAD), audio processing, and multi-turn caller context.**
- **Tech Stack: Python, Pipecat, Vertex AI, Qdrant, BM25, STT, TTS, WebSockets, VAD, FastAPI**

2) Mandi-Weather Pipeline — **GitHub**

- **Developed an automated agricultural data pipeline for collecting and processing mandi market price, arrival, and weather data.**
- **Built resilient web scraping with site-structure change detection, date backfill, and automatic recovery.**
- **Migrated data storage to PostgreSQL and developed state–district–market taxonomy for structured querying.**
- **Implemented geocoding to map market yards to pincodes and coordinates for location-aware price retrieval.**
- **Tech Stack: Python, Web Scraping, APIs, PostgreSQL, Azure, Geocoding, Data Pipelines**

3) AI Resume Analyzer & Job Matcher — **Live**

- **Developed a full-stack AI application that evaluates resumes against job descriptions and generates ATS compatibility scores.**
- **Implemented resume parsing, keyword extraction, and job-description matching to identify missing skills.**
- **Built dynamic AI-powered feedback generation for role-specific resume improvements.**
- **Designed RESTful APIs, frontend-backend workflows, and database operations for real-time analysis.**
- **Tech Stack: React.js, Node.js, Express.js, MongoDB, REST APIs**
